Introduction

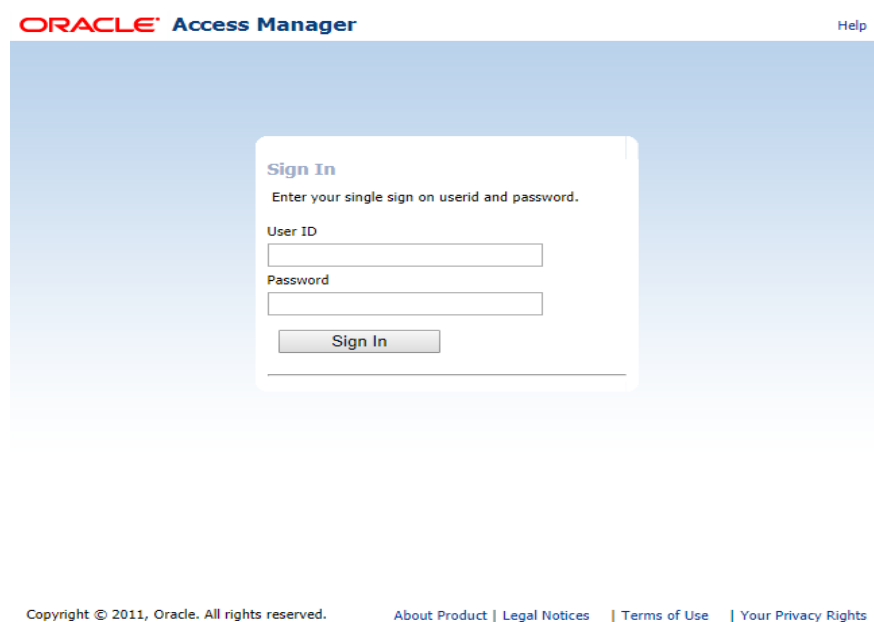

The Festival Reporting Module is a Business Intelligence Tool that has been developed using Oracle's **Application Express** (APEX). APEX is a fully featured Integrated Development Environment (IDE) used to develop a vast array of applications, ranging from simple table driven applications, spreadsheet replacement applications, and complex interactive applications to Business Intelligence solutions.

How to Login To the Festival Reporting Module

To log into APEX you must first log into Oracle Access Manager (OAM) – this security layer authenticates and verifies your user account and allows access to applications developed using Oracle technologies. OAM is the gateway to all Oracle (and therefore APEX) applications.

To login do the following:

- In your browser type in the following URL: <https://adelphi2.ugle.org.uk/apex/f?p=110>
- Log in to OAM with your account details (usually your first Initial and Surname, i.e. PTAYLOR for Philip Taylor)

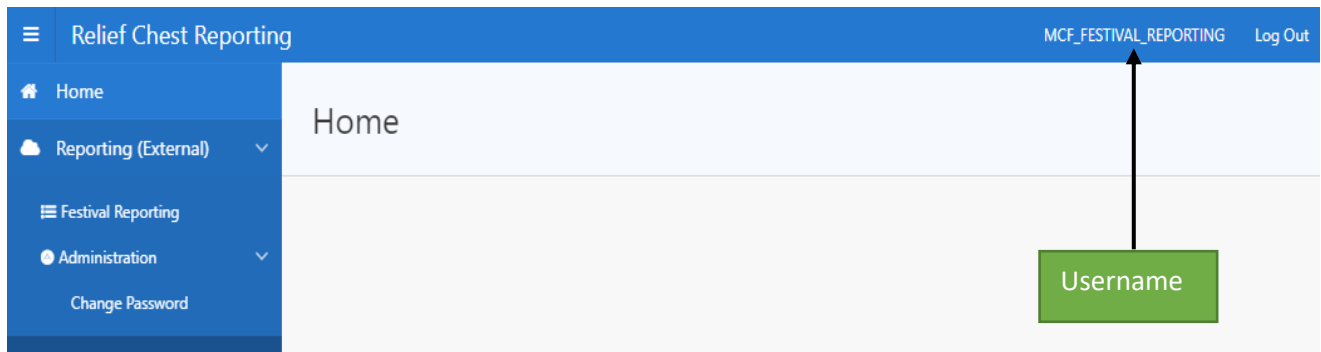

When you have logged into OAM you can then log into APEX as below:

- Log in to APEX with the same username as above and your password (note these are different user accounts and as such *can* have different passwords)

Home Page

When you log in the Home page is displayed as below. From here you can change your password or go straight to Festival Reporting Pages

Changing Your Password

Click **Change Password** to access the Change Password page –

- Enter in your current APEX password and your new password
- Press the Change Password button

A screenshot of the 'Change Password' form. The breadcrumb trail at the top reads 'External Provincial Users / Administration /'. Below this is the title 'Change Password'. The form itself is a light gray box with a title bar 'Change Password'. Inside, there are two input fields: 'Current Password' and 'New Password'. To the right of the 'Current Password' field is a blue button labeled 'Change Password'. At the bottom left of the form is a blue button labeled 'Close'.

Please note that this will change your **APEX** user account password only.

In order to change your **OAM** user account password you must request this service from your Allocated support. ***If you are an ADELPHI 2 user then you need to request a new password from your existing contact.*** An automated email will be sent to the email address registered to your user account containing a temporary password.

The process from there is as below:

- Log into Adelphi 2 using this URL <https://adelphi2.ugle.org.uk/ADelphi2/faces/master.jspx> (Adelphi 2 is the application that in effect runs OAM and as such is the place to change your OAM password)
- The change password page (below) will be displayed
 - Enter in the temporary password from the automated email
 - Enter in your new password
 - Repeat the password
 - Press OK

Note the following password format rules:

- Must contain at least one uppercase letter
- Must contain at least one lowercase letter
- Must contain at least one number
- Must contain at least one special character (\$ or #)
- Must be at least 8 characters in length

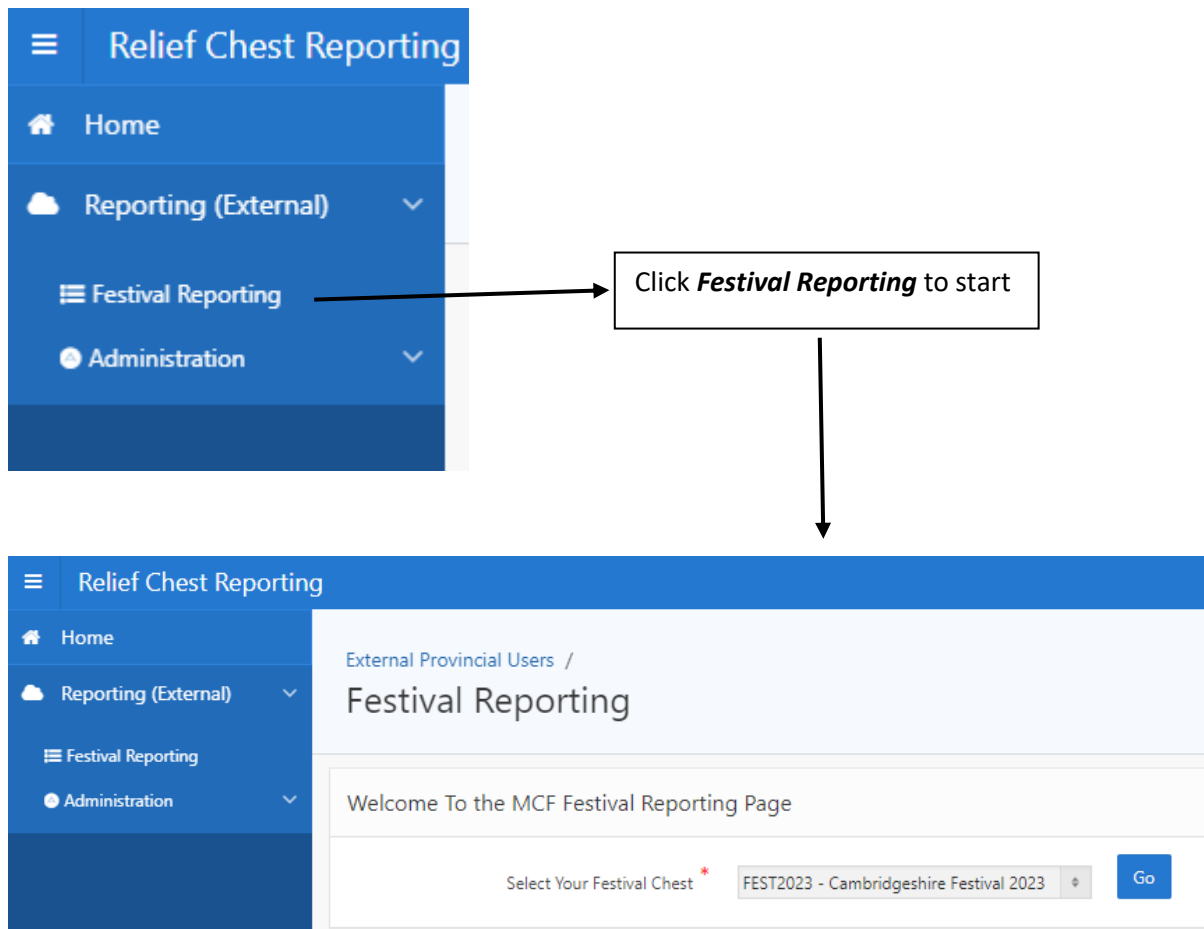

* Current Password

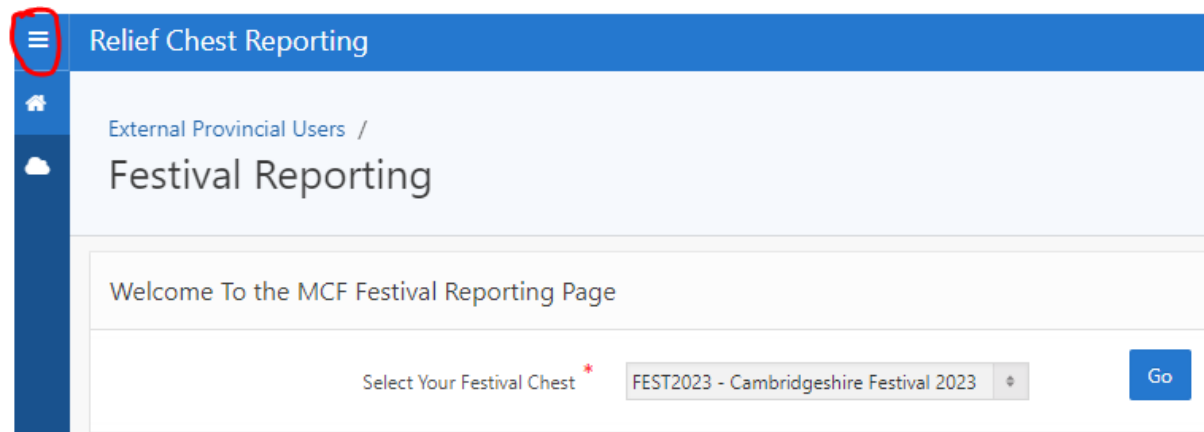

* New Password

* Confirm Password

Festival Reports

To maximise the page real estate click on the three lines above the menu as below

This user has access to FEST2023 – Click **Go** to access the Reporting Data

The reporting data is retrieved from a dedicated reporting area and displayed on the main Festival Reporting Page.

A couple of things to note -

The reporting data has been crystallised by the Relief Chest month-end process. When month end is run all Festival data is queried, computed and stored in a set of dedicated tables, therefore they will remain unchanged until the next month-end process is run.

The date of crystallisation is displayed below – this is important as it lets you know when the data was last updated.

An 'As at date' is also displayed, again this is important as it lets you know the period the reporting data covers, i.e. from the Chest opened date to the 'as at date'.

The screenshot shows the 'Relief Chest Reporting' interface. The top navigation bar includes 'Relief Chest Reporting', 'MCF_FESTIVAL_REPORTING', and 'Log Out'. The left sidebar shows 'External Provincial Users /' and 'Festival Reporting For FEST2023'. The main content area displays a dropdown menu for 'Festival Report for FEST2023 (Cambridgeshire Festival 2023) as at 31-JAN-2019. Report crystallised on: 31-JAN-2019'. Below this, a green box contains the text 'Balance Error Text Here'. To the right of this box is a button labeled 'Download the Complete Report to Excel'. Below the error message is a tabbed interface with tabs for 'Reconciliation', 'Lodge', 'Lodge Summary', 'Member', 'Member Summary', 'Contract Type Summary', 'Lodge Grouping Summary', 'Tools', and 'Notes'. The 'Reconciliation' tab is selected, showing a table with the following data:

Report Total	£227,781.55
Less Donations Made	£184,887.71
Closing Balance as per Reporting	£42,893.84
Closing Balance as per Relief Chest Statement	£42,893.84
Balance Difference	£0.00

Now we know the parameters of the reporting data the next thing to look at is the reconciliation data – this is the same principle as used in the Festival spreadsheets. A balance Difference of £0.00 indicates that the reporting data agrees with the statement data. If there is a difference then this is highlighted with the following text (which is displayed below the difference plus it remains visible above the reporting data as indicated)

A Balance error exists in the Festival Report - The two closing balances in the Reconciliation Tab should agree. Please contact your Allocated Support.

Page Layout

The Festival Reporting page is split into 5 sections all of which can be expanded and contracted as below.

Festival Reporting

▶ Main Festival Report for FEST2023 (Cambridgeshire Festival 2023) as at 30-APR-2019. Report Crystallised on: 02-MAY-2019

Download All Charts 

Festival Totals by lodge

Downloading Data to Excel

Assuming we have a zero balance difference, you can download the data to Excel if you wish. This can be done in one of two ways. To generate one spreadsheet with multiple tabs click the

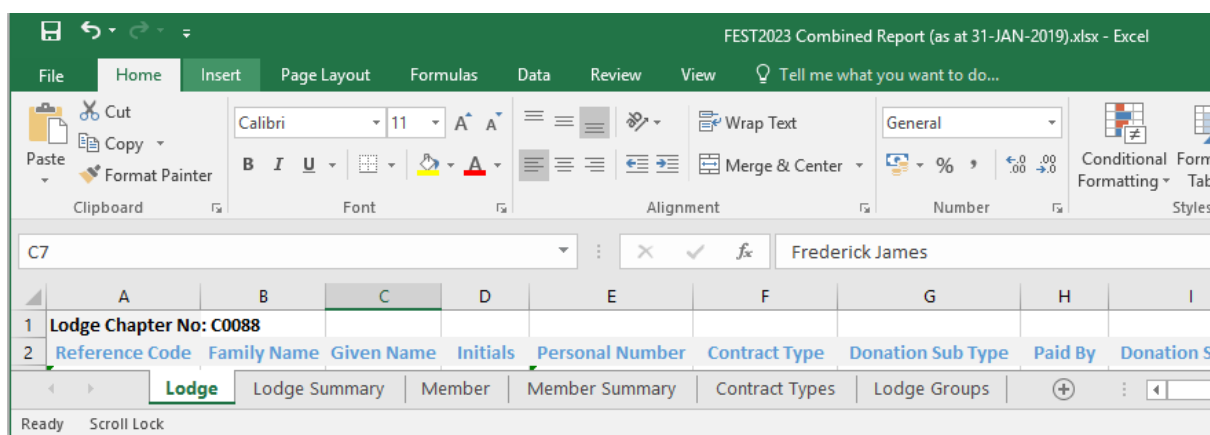

Download the Complete Report to Excel 

button.

This button remains visible when you are in the Festival Report section of the page.

▼ Festival Report for FEST2023 (Cambridgeshire Festival 2023) as at 31-JAN-2019. Report crystallised on: 31-JAN-2019

Example Excel Report

Alternatively, you can download each section of the report separately by pressing the download button located in each of the Reporting tabs as below:

Reporting Tabs

Lodge	Lodge Summary	Member	Member Summary	Contract Type Summary	Lodge Grouping Summary
Download Lodge Section to Excel 	Download Lodge Summary Section to Excel 				
Download Member Section to Excel 	Download Member Summary Section to Excel 				
Download Contract Type Summary Section to Excel 	Download L/C's Yet To Contribute Section to Excel 				
Download Lodge Group Summary Section to Excel 	Download Notional Interest Section to Excel 				

Each downloaded file has the following naming convention

- Chest Number – Report description - (as at date), i.e.
 - *FEST2023 Combined Report (as at 31-JAN-2019).xlsx*
 - *FEST2023 Lodge Report (as at 31-JAN-2019).xlsx*

When you download the data using the download to Excel buttons mentioned above, it is important to remember that the Excel spreadsheet will contain exactly what is being displayed on screen including any highlighting, i.e. it is 'wysiwyg' (What you see is what you get).

This allows you to tailor your download for a specific purpose by hiding / rearranging columns, filtering data plus a whole host of other data manipulation tools and functions some of which are described in the next section of this guide.

Downloading Individual Lodge Reports

Individual reports for each unit within the province covered by the festival can be downloaded by pressing this button.

[Download Individual Lodge Reports to Excel](#) 

The result is a zip file containing individual Excel files – as this is not generated from on-screen data there is no highlighting.

This PC > Downloads > FEST2023 Individual Lodge Report (as at 31-JAN-2019).zip

Customising Data

As mentioned APEX allows you to customise your data to view on-screen or to download. These customisations can also be saved in APEX as reports against your user account allowing you to build up your own personal library of reports.

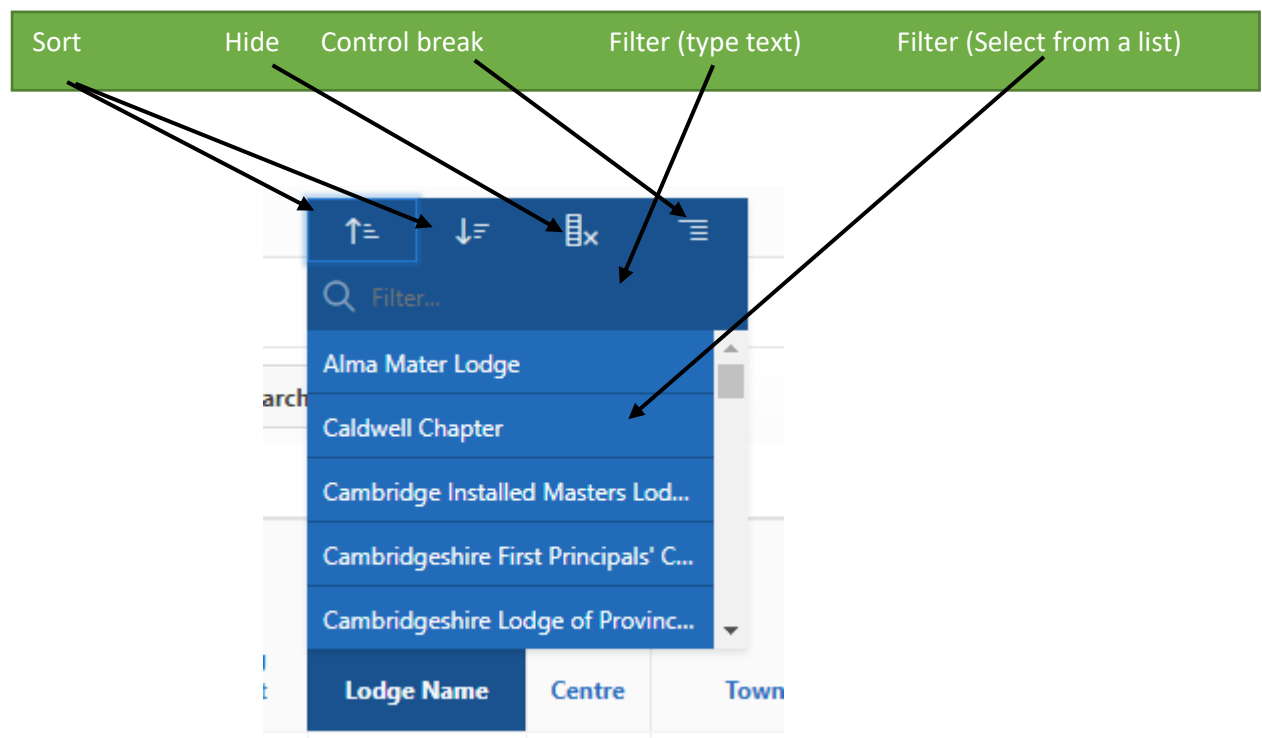

Accessing APEX options

Column Headings

Clicking on any column heading, as below, reveals a submenu that allows you to sort the data, hide the column, add a control break and filter by typing in text next to the magnifying glass or by selecting from the list of values for that column.

Column headings

Lodge Chapter No 	Total To Date	Total Forecast	Pending Forecast	Lodge Name	Centre	Town	Province Member Count
--	---------------	----------------	------------------	------------	--------	------	-----------------------

The diagram illustrates the APEX column heading submenu. A green bar at the top lists the available options: Sort, Hide, Control break, Filter (type text), and Filter (Select from a list). Arrows point from these labels to the corresponding icons in the submenu. The submenu itself is a blue box that appears when a column heading is clicked. It contains icons for sorting (up/down arrows), hiding (eye with slash), control break (table with 'x'), and filtering (magnifying glass). Below the icons is a search bar labeled 'Filter...'. Under the search bar is a list of lodge names: Alma Mater Lodge, Caldwell Chapter, Cambridge Installed Masters Lod..., Cambridgeshire First Principals' C..., and Cambridgeshire Lodge of Provinc... The submenu also shows the column names 'Lodge Name', 'Centre', and 'Town' at the bottom.

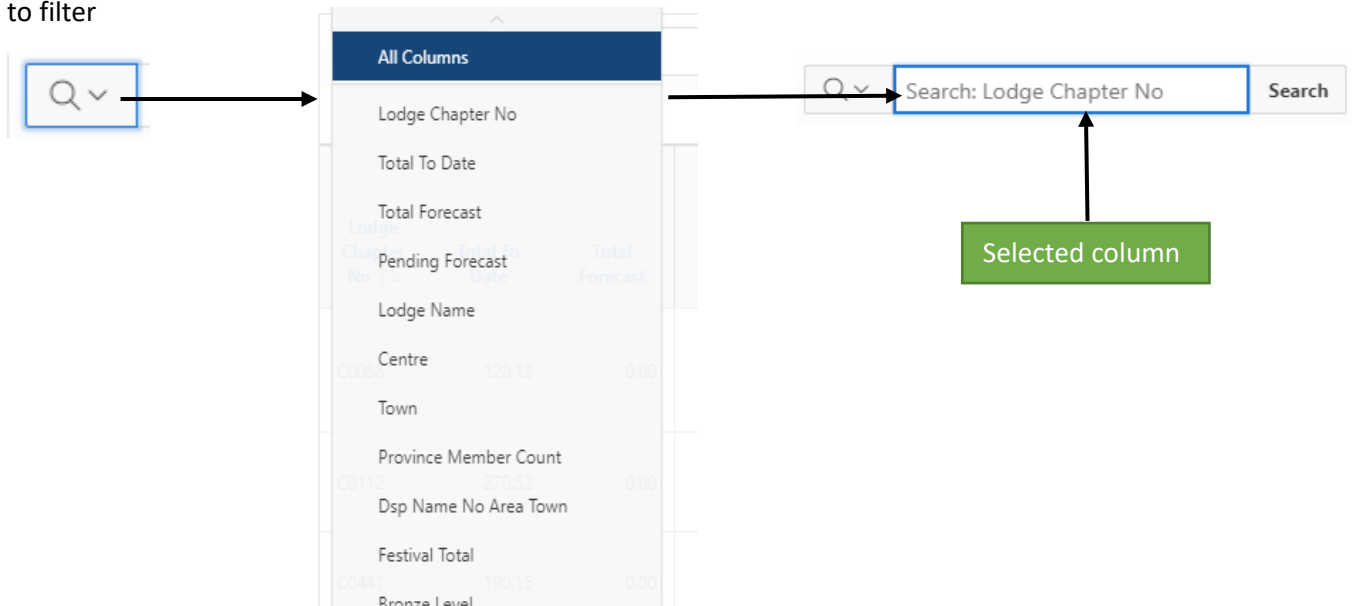

Search Bar

You can also filter your data at row or column level using the Search Bar

Row level – type in the box to search for text in any column of the report data

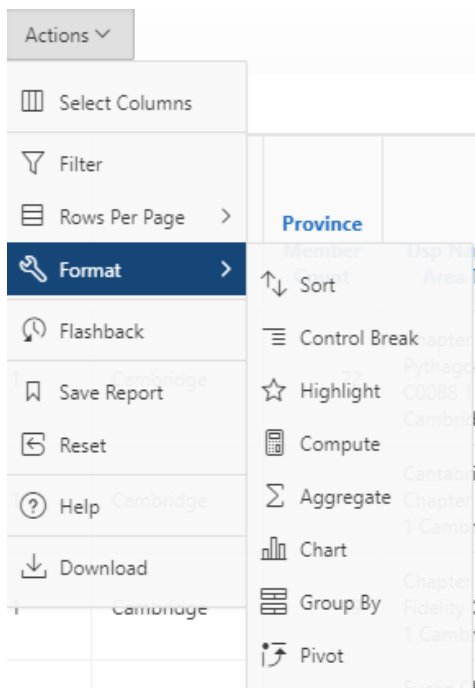

Column Level – Click on the magnifying glass below, select a column from the list, type in your text to filter

Actions Menu

The same options, as well as a few others, are available from the APEX Actions menu – these options from the Actions menu also offer increased functionality.

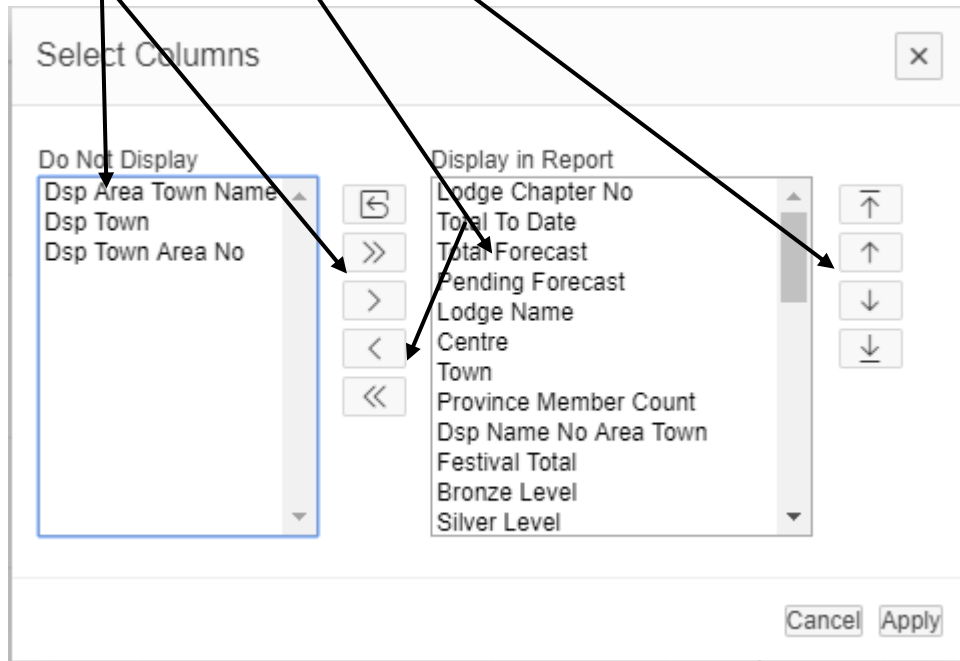

Actions Menu - A look at the Options Available

Actions → Select Columns

Allows you to:

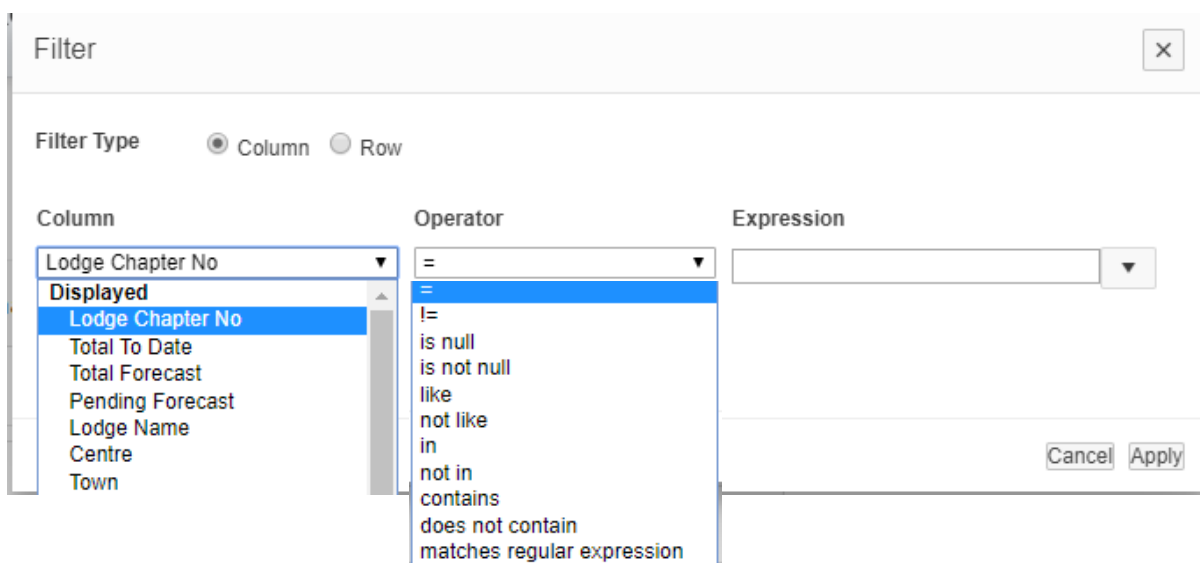

- Re-order columns
- Hide columns
- Add columns

Actions → Filter

Allows you to filter on any column using an array of operators.

Multiple filters can be added one at a time

Actions → Rows Per Page

Allows you to select the number of rows visible on the page

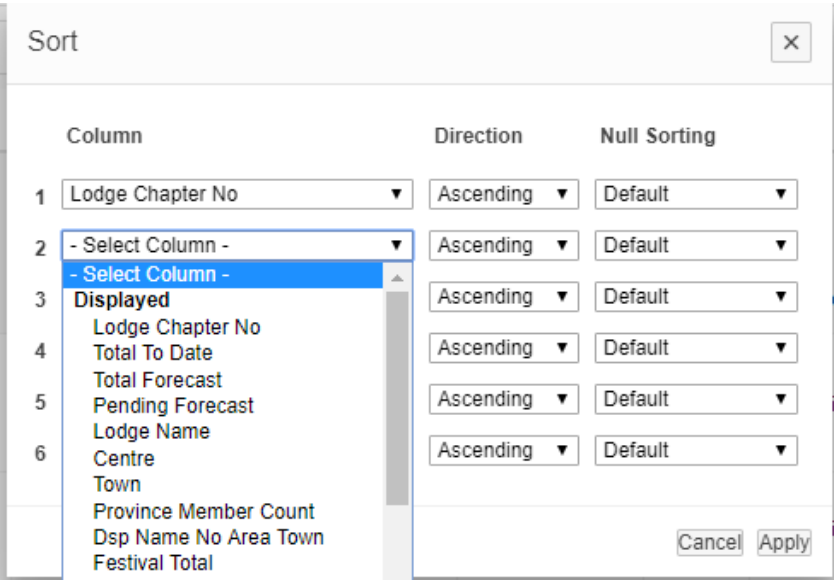

A vertical dropdown menu with a light gray background. It contains the following options from top to bottom: 1, 5, 10, 15, 20, 25, 50 (which is selected and has a dark blue circle next to it), 100, 1000, and All. The menu is partially obscured by a 'Summary' label on the left.

Format

Actions → Format → Sort

Allows you to sort by multiple columns simultaneously

A 'Sort' dialog box with a title bar and a close button (X). It contains a table with three columns: 'Column', 'Direction', and 'Null Sorting'. The table has six rows. The first row is 'Lodge Chapter No' with 'Ascending' direction and 'Default' null sorting. The second row is '- Select Column -' with 'Ascending' direction and 'Default' null sorting. The third row is '- Select Column -' with 'Ascending' direction and 'Default' null sorting. The fourth row is 'Displayed' with 'Ascending' direction and 'Default' null sorting. The fifth row is 'Lodge Chapter No' with 'Ascending' direction and 'Default' null sorting. The sixth row is 'Total To Date' with 'Ascending' direction and 'Default' null sorting. The seventh row is 'Total Forecast' with 'Ascending' direction and 'Default' null sorting. The eighth row is 'Pending Forecast' with 'Ascending' direction and 'Default' null sorting. The ninth row is 'Lodge Name' with 'Ascending' direction and 'Default' null sorting. The tenth row is 'Centre' with 'Ascending' direction and 'Default' null sorting. The eleventh row is 'Town' with 'Ascending' direction and 'Default' null sorting. The twelfth row is 'Province Member Count' with 'Ascending' direction and 'Default' null sorting. The thirteenth row is 'Dsp Name No Area Town' with 'Ascending' direction and 'Default' null sorting. The fourteenth row is 'Festival Total' with 'Ascending' direction and 'Default' null sorting. At the bottom right of the dialog are 'Cancel' and 'Apply' buttons.

	Column	Direction	Null Sorting
1	Lodge Chapter No	Ascending	Default
2	- Select Column -	Ascending	Default
3	- Select Column -	Ascending	Default
4	Displayed	Ascending	Default
5	Lodge Chapter No	Ascending	Default
6	Total To Date	Ascending	Default
	Total Forecast	Ascending	Default
	Pending Forecast	Ascending	Default
	Lodge Name	Ascending	Default
	Centre	Ascending	Default
	Town	Ascending	Default
	Province Member Count	Ascending	Default
	Dsp Name No Area Town	Ascending	Default
	Festival Total	Ascending	Default

Actions → Format → Control Break

Allows you to add multiple Control Breaks – Every time the value of the control break changes the report adds a break, which is a blank line. This blank line is where any aggregates are displayed.

	Column	Status
1	Lodge Chapter No	Enabled
2	- Select Column -	Enabled
3	- Select Column -	Enabled
4	Displayed	Enabled
5	Lodge Chapter No	Enabled
6	Total To Date	Enabled
7	Total Forecast	Enabled
8	Pending Forecast	Enabled
9	Lodge Name	Enabled
10	Centre	Enabled
11	Town	Enabled
12	Province Member Count	Enabled
13	Festival Total	Enabled
14	Bronze Level	Enabled

Actions → Format → Highlight

Allows you to add multiple highlighting at row or single cell level, i.e. you may want to highlight a row in red where a donor has donated more than £1000. You can highlight the background, foreground or both

Name:

Sequence:

Enabled:

Highlight Type:

Expression:

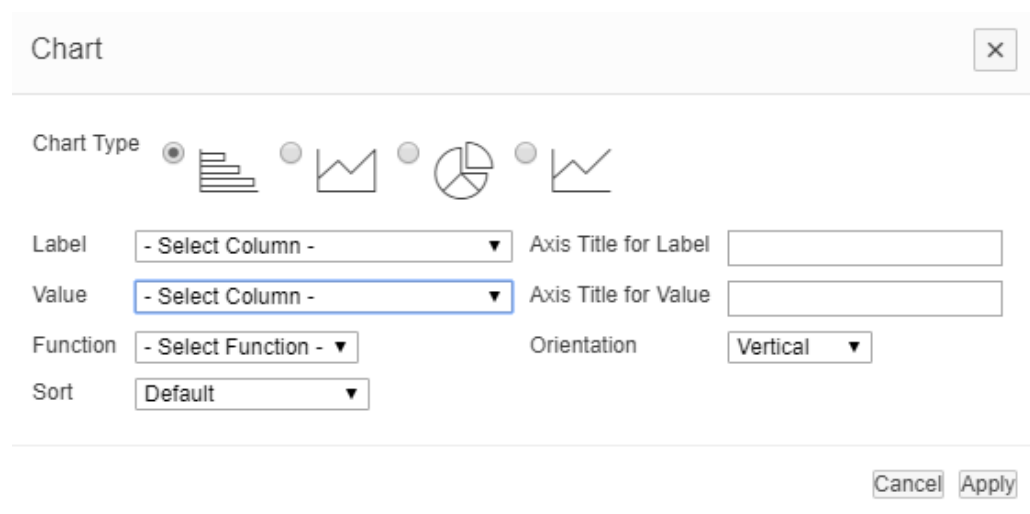

Actions → Format → Aggregate

Allows you to perform maths functions on number columns, mainly used to calculate subtotals and counts.

Actions → Format → Chart

Allows you to generate a range of charts based on the reporting data.

Actions → Format → Group by

Allows you to add multiple columns to group your data by whilst performing a maths function on a number column. Typically, this is used to provide totals and counts for a given column value, i.e. if you wanted to know how much money had been donated by Lodges that had gained an honorific then you can group by honorific and sum the total to date.

Group By
✕

1 Honorific Achieved

2 - Select Group By Column -

[Add Group By Column](#)

Actions → Flashback

Oracle stores any data changes in an internal flashback table that by default is purged after 3 hours. This then allows you to step back in time to view your data as it was before changes were made.

Flashback
×

A flashback query allows you to view the data as it existed at a previous point in time.

As of minutes ago.

Cancel Apply

Actions → Save Report

Allows you to save your customised report options as a named report. This named report can then be selected from a list. Here we are saving a report called Lodges in Cambridge.

Save Report
×

Save
(Only displayed for developers)

Name

Description

Cancel Apply

The saved report can now be accessed as below

1. Primary Report
⬆

Default
1. Primary Report
Private
1. Lodges in Cambridge

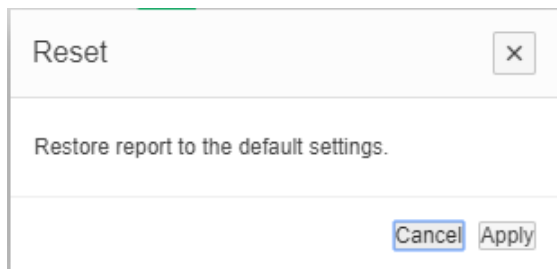

Rows
50

Actions

The Primary Report now represents the base report - as developed with no additional customisations. You are now able to easily switch between your customised reports and return to the primary one. As previously mentioned, saved reports are stored against your user account and as such remain private to you.

[Actions](#) → [Reset](#)

Removes any unsaved customisations from the report on view, this applies to any report whether it be the Primary report or a saved report.

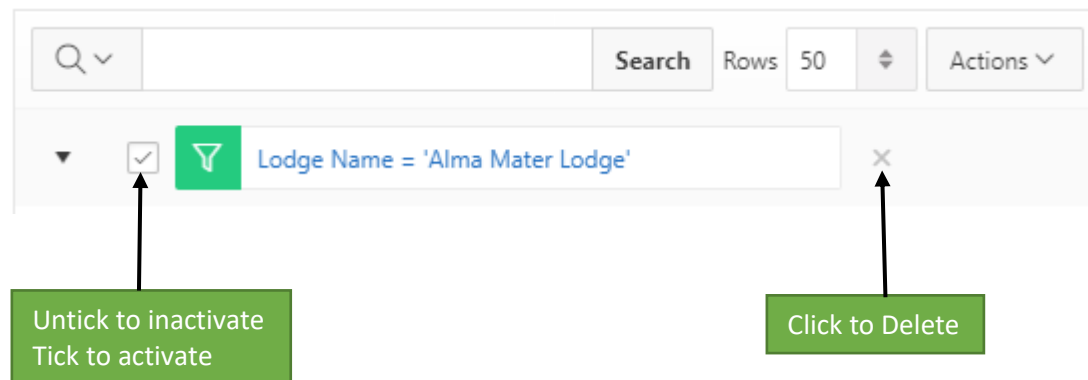

[Actions](#) → [Help](#)

Provide more help for interactive reports.

[Selected Report Customisation Options](#)

Whenever a report is customised, the customisation options used are displayed on screen below the search bar. This not only allows you see the report parameters at-a-glance but it also enables you to inactivate/activate or delete the option(s) selected, see below.

Sharing Customised Reports (Report Administrators Only)

Once you have saved your customisations, they can be shared with any other user within your province as well as with the Relief Chest staff (this is particularly useful for troubleshooting purposes). See below.

Maintenance (Data Administrators Only)

The maintenance area of the Festival Reporting Page is located immediately below the Festival Report area. The easiest way to access this is to collapse the Festival Report areas by clicking the triangles as below.

The Maintenance area consists of the following tabs

- Lodge Memberships
 - UGLE Lodge Membership Stats
 - FEST2023 Lodge Membership Stats
- Lodge / Chapter Structure
 - Lodge / Chapter Town or Group Maintenance
 - Lodge / Chapter Area or Centre Maintenance
 - Lodge / Chapter Group Assignments
- Honorifics
 - Honorifics for a Lodge
 - Honorifics for a Chapter
 - Honorifics for a Member
- Lodge Festival Targets
- DD Forecast End Date

Viewing Amendments

After making a change to your Festival data you need to refresh the tab to view the amendment, to do this click in the search bar of the tab in question and press return.

UGLE Lodge Membership Stats

Strictly speaking, there is no data in this tab for a festival to maintain, however it has been included here so that you can view the membership stats, according to UGLE, in real time (the data is updated overnight to take into account joiners and leavers). The data gives you an opening membership balance for the period in question and a closing membership balance for the same period, it also includes the Lodge status.

<div> <input type="text"/> <input type="button" value="Search"/> Rows 50 <div> <div></div> <div></div> </div> <input type="button" value="Actions"/> </div> <div>1 - 44 of 44</div>

Festival Lodge Membership Stats

Some festivals calculate their Lodge honorifics as a multiple of the honorific level and the membership count – in order to do this Festival Lodge membership stats must be created, this can be done at any time and will take immediate effect. Once created they can be easily adjusted or deleted. Below you can see that Festival Lodge stats have been created for FEST2023.

Creating Festival Lodge Membership Stats

To create a set of stats simply press the button below.

Create / Refresh Lodge Memberships

As the name suggests this is a dual-purpose button, if you do not have any Festival Lodge membership stats then pressing the button will create a complete set of stats for you. All of the Lodges and Chapters within your province will be created using the UGLE stats as a starting point.

Pressing the button when you already have a set of stats will add any newly consecrated Lodges and Chapters from within your province to the list. If you prefer you can manually add Lodges and Chapters by pressing the button below – this may be because not all Lodges and Chapters are required to have an entry or if you want to create an entry for other orders, other units or lodges / Chapters that are not in your province.

Lodge / Chapter Town or Group Maintenance

If your province has towns or groups that individual Lodges and Chapters belong to and you want to report on this then the Provincial structure must be entered. Once entered the Lodges and Chapters can be assigned to the Town or group. Below you can see some Towns for FEST2023.

Honorifics Maintenance

Lodge/Chapter and member honorifics are created and maintained in the same way through their dedicated tabs. The honorifics can be created and amended at any time with the results calculated in real-time in the reporting data tabs that use this data. This allows you to see the effect of the saved honorific values. Below you can see the current honorific values for FEST2023.

Creating Lodge / Chapter Honorifics

To create an honorific press the button and complete the fields in the form below. The Create Honorifics button is displayed in each of the Honorific tabs whilst there are honorifics still to be created. Once they have all been created the button is no longer visible.

The honorific select list contains a list of the honorifics that can be used, the list will automatically exclude honorifics that have already been used thus ensuring duplicates cannot be created.

The Multiply Level By Member Count field ensures the honorific level is dynamic and will result in tailored honorific levels for each Lodge depending on the previously entered Festival Lodge Membership stats.

The Include Tax field instructs the application to include or exclude Gift Aid tax reclaims when calculating honorific holders.

DD Forecast End Date

The DD Forecast End Date is the maximum date up to which Direct Debit forecasts are made to. For instance if a direct Debit has been set-up as indefinite then the forecast for that DDI will be up to the DD End date as specified. The DD Forecast End date is defaulted to the Festival End date plus one month.

The DD Forecast End Date can be modified by clicking the pencil and selecting or entering a new date, as below.

DD Forecast End Date
